Professional Summary

Self-starting Full-Stack Developer proficient in JavaScript (ES6+), React.js, and scalable Node.js architectures. Passionate about building intelligent AI agents, designing REST APIs, and automating workflows. Adept at critical problem-solving, debugging, and deploying production-grade systems within strict performance constraints. Eager to take extreme ownership and contribute to transformative tech solutions at Iksha Labs.

Technical Skills

Frontend: JavaScript (ES6+), React.js, HTML/CSS, Tailwind CSS, Vite
Backend & Databases: Node.js, Express.js, Python, MongoDB, MySQL, REST API Design
Architecture & DevOps: Production-grade Deployment (Render/Vercel), Git, CI/CD, Performance Optimization
AI/ML & Automation: Agentic Workflows, YOLOv8 (ONNX), Gemini API integrations

Core Projects (AI Automation & Architecture)

- E.L.L.E [Environmental Lens for Liquid Evaluation]** 2025
- Engineered a full-stack AI platform (React.js, Python, MongoDB) automating complex diagnostic workflows via a single REST API call, featuring real-time analytics and cache invalidation.
 - Optimized production architecture to operate under a strict 512MB RAM cloud constraint by designing an ONNX-headless YOLOv8 inference pipeline with lazy model loading, preventing out-of-memory failures.
- SehPaathi (AI Document Analysis Platform)** 2026
- Developed a full-stack, AI-agentic application utilizing the Gemini API to automate document analysis workflows and provide an interactive Q&A interface over user data.
 - Architected a secure, scalable multi-module system with persistent session state management, handling complex API integrations and environment variables in version-controlled environments.

Technical Experience

- Innovation & Tech Coordinator** Nov 2025 – Present
Unnat Bharat Abhiyan (Ministry of Education) VIT Bhopal
- Managed tech-driven community projects, collaborating on strategic solutions and mapping complex local requirements to actionable technology implementations.
- Automation & Operations Intern** June 2024 – July 2024
CollegeTips.in
- Implemented process automation solutions and workflow improvements, utilizing critical problem-solving skills to debug systems and achieve a 15% productivity increase.
- Technical Team Lead** May 2025 – Present
Mharo Rajasthan Club VIT Bhopal
- Directed technical operations for high-traffic event registration systems serving 1500+ users, mentoring junior developers and driving an agile, feedback-oriented culture.

Hackathons & Competitions

- 3rd Place Winner - Blockchain Nexus (Pfizer Supply Chain)** Mar 2025
Techkriti'25 | IIT Kanpur
- Built a Hyperledger Fabric blockchain architecture to automate and secure Pfizer's pharmaceutical supply chain workflows, showcasing strong aptitude for enterprise tech solutions.
- 1st Place Winner (Out of 200+ Teams) - Accessible Smart-Health** 2025
Code Verse Hackathon
- Engineered an innovative smart-health platform integrating IoT devices to track patient vitals and automate medical alerts, aligning with medical technology architectural needs.

Education

- Bachelor of Technology (B.Tech) in Computer Science** 2023 – 2027
VIT Bhopal University Bhopal, MP
- Senior Secondary Education (Class 12)** 2021 – 2023
DAV Kalisindh Thermal Public School Rajasthan
